CREATIVE PRECISION

Channeling AI to Deliver Precise Outcomes.

Practitioner-built operating system for mid-market organizations deploying AI that actually arrives somewhere.

Built on NIST AI RMF · ISO 42001 · EU AI Act

FOUNDING DECK

Gordon Chan

Founder

Director of AI Solution Architecture

Co-Founded AI Center of Excellence

14+ years enterprise architecture

Point72 · UTIMCO · Resultant

NIST · ISO 42001 · EU AI Act

2026 · CONFIDENTIAL

88% of organizations use AI. Most never get past the pilot.

88%

use AI in at least one function

stuck in pilot purgatory

McKinsey 2025

42%

fail to scale AI models to production

after significant investment

ModelOp 2025

1.5%

believe they have adequate governance

headcount to manage AI risk

IAPP 2025

The issue isn't the AI. It's the absence of an operating system to channel AI toward business outcomes — safely, at scale, with accountability.

THE INSIGHT

- Most governance programs are bolt-ons — slowing teams down without creating real safety.
- Big 4 firms charge $150K–$500K for frameworks built by analysts who've never run a deployment.
- Mid-market organizations can't afford enterprise tooling and don't have the headcount to operationalize theory.

THE REFRAME

"What if AI was designed around the destination — not the technology?"

The organizations winning with AI aren't the ones with the most tools or the most governance. They're the ones who defined the destination first — then built the operating infrastructure to get there safely, at scale, with accountability.

> *"Stop automating the old. Start designing the new."*
>
> — Gordon Chan, Creative Precision

THE SOLUTION

Creative Precision

A complete operating system for AI that delivers precise business outcomes — governance, methodology, and infrastructure working as one.

01

The Governance Fabric

A three-zone operating system — Set the Rules, Deploy with Confidence, Scale & Evolve. Governance is the enabler. Precise business outcomes are the point.

02

Productized for Mid-Market

Ready-to-deploy toolkits from $47 to $2,500. Below corporate card thresholds. No procurement friction. No 12-month engagement to get started.

03

Agentic-Ready by Design

Agent Registry, Autonomy Tiers, Guardian Agents. The only operating system designed for autonomous AI outcomes — not retrofitted for it.

04

Regulatory Coverage Built In

NIST AI RMF, ISO 42001, EU AI Act Annex IV. Compliance isn't the destination — it's built into the path so you can move fast without breaking things.

The Governance Fabric

One operating system. Three zones. Built to channel AI toward precise business outcomes.

01

SET THE RULES

Policy, Risk & Oversight

- Use policy & ethics framework
- Risk tiering + routing logic
- Regulatory mapping (NIST · ISO · EU AI Act)
- Three lines of defense model
- Vendor & third-party assessment

Defines what's allowed, who owns it, and how risk is managed before any model ships.

02

DEPLOY WITH CONFIDENCE

Lifecycle, Standards & Documentation

- Four-gate deployment lifecycle
- ML & data quality standards
- Model cards + AI inventory
- Multi-speed deployment lanes
- Value dashboards & ROI tracking

Moves AI from pilot to production — with the guardrails that let teams move fast without breaking things.

03

SCALE & EVOLVE

Enablement, FinOps & Agentic Extension

- Change management + training
- AI FinOps & budget governance
- Agent registry & autonomy tiers
- Guardian agents & kill switch
- Governance automation (Wave 3+)

Sustains AI at scale — including agentic workflows that no other mid-market framework is built for.

Regulatory coverage built in across all three zones: NIST AI RMF · ISO 42001 · EU AI Act Annex IV

A $308M market heading to $1.4B — and AI outcomes is where it's going.

TAM

Total Addressable Market

$308M → $1.4B

Global AI governance market · 2026 → 2030 · 35.7% CAGR

Grand View Research (conservative)

SAM

~$2M (2026) → ~$8M (2030)

$308M x 32.6% NA x 33% services x 30% mid-market x 20% digital

SOM

Serviceable Obtainable Market

$60K–$120K Year 1

Bootstrap · 2–3% free-to-paid conversion · consulting upsell

→ $150K–$350K Yr 2 → $300K–$600K Yr 3

70% of mid-market firms recognize need for external AI governance support

47% of those with AI budgets spend on AI consulting services

35.7% CAGR for the AI governance market through 2030

Mid-market AI leaders. Underserved. Right now.

IDEAL CUSTOMER PROFILE

TITLE	Director of AI/ML · VP of Data & Analytics CTO · Head of AI Strategy
COMPANY	$50M–$1B revenue · 200–5,000 employees Professional services, fintech, healthcare
PAIN	3–7 AI pilots, none in production Board asking for ROI. Shadow AI spreading.
TRIGGER	Board meeting in 60 days · New regulation Competitor shipped. CTO asked for a strategy.
BUDGET	$47–$297 per toolkit without procurement $5K–$15K for implementation support

23.5%

cite lack of qualified professionals as the #1 AI governance barrier

IAPP 2025

40%

of enterprise apps will embed AI agents by end of 2026

Gartner — only 21% have mature agent governance

$35M

maximum EU AI Act fine — or 7% of global annual turnover

EU AI Act — enforcement began Feb 2025

88%

of orgs use AI · most remain stuck in pilot purgatory

McKinsey — every stuck pilot is a buyer

Creative Precision sits where Big 4 pricing is out of reach, platform tooling requires frameworks that don't exist yet, and mid-market buyers are actively looking for a practitioner who's been in the room.

Four products. One system. A platform on the horizon.

FREE · ALWAYS

$0

Precision Reflect

AI Outcome Readiness Assessment. Governance posture score, gap analysis, priority roadmap. 5 minutes. No email required.

TIER 1

$197

Precision Essentials

Risk Classification Framework + scoring logic. AI Use Policy template. Model Card template. 30-60-90 day quick-start roadmap.

TIER 2

$697

Precision Plus

Everything in Essentials + CoE Charter, RACI, approval workflows. Full NIST, ISO 42001, and EU AI Act compliance matrices.

TIER 3

$2,997

Precision Premier

Everything in Plus + 90-min live strategy session. Custom implementation roadmap. 30-day async follow-up. Where margin lives.

FUTURE

•••

Precision Platform

The SaaS vision. A platform that operationalizes the entire system — always on, continuously improving, scaling with your AI ambition.

On the horizon →

Year 1 SOM: $60K–$120K · Year 2: $150K–$350K · Year 3: $300K–$600K · Platform (Wave 3+): TBD

Not a consulting firm. Not a template factory. Something new.

	Big 4 Consulting	Template Marketplaces	Creative Precision

Creative Precision is not a competitor to enterprise platforms — it's the organizational design layer those platforms require before deployment makes sense.

Built. Not theorized.

COMPLETE TODAY

- NIST AI RMF Traceability Matrix — 100% coverage
- ISO 42001 Control Mapping — 100% coverage
- EU AI Act Annex IV Checklist + Declaration of Conformity
- Governance Fabric — three-zone operating system documented
- 3 product tiers priced and near-launch ready
- AI Outcome Readiness Assessment — live React application
- 5-page website with dual conversion architecture
- Founding Access pricing strategy locked

WAVE 1 — Now — Q2 2026

— Product launch · 100 paid customers
— Email list to 1,000+
— EU AI Act urgency content campaign
— Founding Access → premium pricing

WAVE 2 — Q3 2026

— B2B2B channel — sell to consultants
— Agentic outcomes toolkit — standalone product
— Speaking engagements · $150K–$350K ARR
— Email list to 5,000+

WAVE 3+ — 2027 onward

— EAGOS platform (SaaS)
— Fractional AI Governance Architect tier
— AI-native governance automation
— $300K–$600K+ run rate

THE FOUNDER

Gordon Chan

Founder, Creative Precision · Director of AI Solution Architecture, Resultant

Co-Founded AI Center of Excellence — Resultant
12-member cross-functional CoE from scratch inside a live enterprise — real stakeholders, real budgets, real governance in production.

Enterprise Architecture & Governance — UTIMCO ($50B+)
Institutional-scale platform governance for one of the largest university endowments in the US.

Quantitative Research Infrastructure — Point72 ($10B+ AUM)
High-stakes ML infrastructure in a regulated financial environment. Where governance isn't optional.

500+ Cloud Migrations — Catapult Systems
Enterprise transformation at scale across industries. Execution experience across the full delivery arc.

Co-Founder — Boolean Brothers
Built and operated a digital agency — operational experience from the ground up.

THE OPPORTUNITY

This is the infrastructure moment.

Every major technology wave creates an infrastructure layer that becomes non-optional. Cloud computing created DevOps. The internet created cybersecurity. AI is creating the operating systems that channel it toward real business outcomes — and that layer is being built right now.

For Strategic Partners

Channel distribution, enterprise introductions, or co-development of the agentic outcomes category. Be part of defining the infrastructure layer that makes AI arrive somewhere.

For Angel Investors

Bridge funding to accelerate product development, content distribution, and Wave 2 category expansion. Demonstrated IP. Practitioner credibility. Regulatory tailwind.

For Enterprise Clients

Deploy the Creative Precision system inside your organization. Define the destination. Build the path. Arrive — with a reference case and co-development rights at Founding Access pricing.

"Stop automating the old. Start designing the new."
